TXM 700A4 Plug

The **700A4 Modular Wire Plug** is a modular 2-pair plug that attaches to 24 AWG solid wire to create a modular cord. This field mountable plug can be used to make an RJ14 interface plug with customized pinout.

The **700A4 Modular Wire Plug** enables you to connect the wire of a newly installed modular telephone jack into another modular jack.

The **700A4** can be used for voice and data applications running under 10Mb/s
