

FPR-1/3X FIBER OPTIC PANEL (1RU)

Product Description

The TXM FPR Series is a family of rack-mounted fiber distribution enclosures that provides splicing and patching of fiber optic terminations using industry-standard LGX adapter plates or MPO/MTP cassettes. Panels can be ordered empty or pre-configured to your specifications. All FPR panels feature front- and rear-latching doors and slide-out trays with stops to prevent stress on delicate fibers. Reversible rack ears allow mounting in either 19- or 23-inch racks.

The TXM FPR-1/3X is a One-Rack Unit (1RU) panel that accommodates 3 standard LGX adapter plates (sold separately or pre-configured). It features front Plexiglas and rear metal doors to allow easy access.

General Specifications

Dimensions: 1.75"(h) x 17.0"(w) x 14.0"(d) 4.45cm(h) x 43.18cm(w) x 35.56cm(d)
